I love to show off my Alpacas!

Call for your Farm Visit Today!

All alpacas at North of the Rock are negative for BVD, any alpacas coming to NOTRA for breeding must have a copy of their testing for PCR- BVD. There are many things to learn in the life of Alpacas. Although alpacas are easy to maintain there is daily and monthly care that should never be forgotten. As with everything I learn new and exciting things about my alpacas everyday. They are not all the same and what one does is not always the same for the next, other than using the same poop pile.

In the last 7 years I have had some great learning experiences and continue to learn daily about our furry friends. I give the best quality care and customer support possible. Working in the Veterinary field as an assistant at a very busy clinic gives me the chance to learn many many things about all animals.
